A rectangle with its diagonals intersecting at the center. The rectangle is oriented horizontally. The diagonals are represented by two straight lines crossing at the center point. The four corners of the rectangle are marked with small black dots.A rectangle with its diagonals intersecting at the center. The rectangle is oriented horizontally. The diagonals are represented by two straight lines crossing each other in the middle of the rectangle.A rectangle with its diagonals intersecting at the center. The rectangle is oriented horizontally. The diagonals are represented by two straight lines crossing each other at the midpoint of the rectangle.A rectangle with its diagonals intersecting at the center. The rectangle is oriented horizontally. The diagonals are represented by two straight lines crossing each other at the midpoint of the rectangle.A rectangle with its diagonals intersecting at the center. The rectangle is oriented horizontally. The diagonals are represented by two straight lines crossing each other at the midpoint of the rectangle.A rectangle with its diagonals intersecting at the center. The rectangle is oriented horizontally. The diagonals are represented by two straight lines crossing each other at the midpoint of the rectangle.A rectangle with its diagonals intersecting at the center. The rectangle is oriented horizontally. The diagonals are drawn from the top-left corner to the bottom-right corner and from the top-right corner to the bottom-left corner. They intersect at a point in the center of the rectangle.A rectangle with its diagonals intersecting at the center. The rectangle is oriented horizontally. The diagonals are drawn from the top-left corner to the bottom-right corner and from the top-right corner to the bottom-left corner. They intersect at a point in the center of the rectangle.A rectangle with its diagonals intersecting at the center. The rectangle is oriented horizontally. The diagonals are represented by two straight lines crossing each other at the midpoint of the rectangle.

A rectangle with its diagonals intersecting at the center, representing the center of mass.

A rectangle with its diagonals intersecting at the center. The rectangle is oriented horizontally. The diagonals are represented by two straight lines crossing each other at the exact center of the rectangle. The four corners of the rectangle are marked by the intersection of the sides and the diagonals.A rectangle with its diagonals intersecting at the center. The rectangle is oriented horizontally. The diagonals are represented by two lines crossing at the center point. The lines are black and have a medium thickness. The rectangle's border is also black and has a medium thickness. The interior of the rectangle is white.A rectangle with its diagonals intersecting at the center. The rectangle is oriented horizontally. The diagonals are drawn from the top-left corner to the bottom-right corner and from the top-right corner to the bottom-left corner. They intersect at a point in the center of the rectangle. The rectangle is defined by a black border, and the interior is white. The diagonals are also black lines.A rectangle with its diagonals intersecting at the center. The rectangle is oriented horizontally. The diagonals are represented by two straight lines crossing each other in the middle of the rectangle.A rectangle is shown with its left vertical side shaded in gray. Two black lines representing the diagonals of the rectangle are drawn, intersecting at the center. The rectangle is oriented horizontally.
